PROFILE

A highly motivated, consistent and efficient worker with admirable work ethic. An ability to easily pick up new languages and coding practices quickly. Strong passion for front-end and back-end development which drives a pro-active, ahead-of-the-game attitude, eager to keep up with the latest technologies and software. Able to solve problems and make decisions in a time effective manner and grasp concepts quickly. Takes a mature and professional approach to the working environment, whether part of a team or independently. Delivers both personal and professional targets on or even before deadlines.

EXPERIENCE

UX DEVELOPER

Invesco Perpetual | October 2015 - Present

- Created a commercial React application which incorporates user account authentication and monetary subscriptions along with physics based spring animations. I was the sole front end developer on an agile "scrumban" team working with backend and devops developers.
- Architected a system for creating quick and custom small landing pages which have all assets compiled through Webpack and through an automated Node build process, get them live quickly.
- Developed various custom web components for use on the AEM CMS system using VueJs.
- Created a Wordpress WooCommerce "webshop" with a custom theme for clients to order branded items.
- Coded a Node REST API service for a centralised access point to data.
- Helped the team become more efficient by creating a digital request form using Nuxt (VueJS with server side rendering) for clients to submit work requests into our team in a digital way. This involved hooking into a Jira API from the service so requests got turned directly into work tickets.
- Using Nuxt, created a anonymous question submitting software so people can submit questions at an event, the presenter could then read and answer in real time.
- Aided in the migration of hundreds of websites to the new magnolia CMS which involved learning and implementing templating language.
- Assisted in creating a JS and SCSS front end pattern library which would help the company maintain a standardised brand when using web components across its many regional sites.

EXPERIENCE

SOFTWARE SYSTEMS SOLUTIONS ENGINEER

Microtech Electronics Ltd | March 2013 - September 2015

Placed at Microtech further to training and certification with Zenos. Initially involved in system support and subsequently as a result of home based studies became involved in software development and more specifically web based development using PHP, JavaScript, CSS, Ajax and some C# and VB. Responsibilities included:

- Creating in-house software to make the company more technologically advanced and efficient. Support the software daily.
- Querying work order data out of the various company databases and manipulate it in to various applications to aid workers with fulfilling orders.
- Setting up, updating & maintaining various employee hardware, including Windows, different Linux Distributions, Raspberry PI's, etc.
- Linux server, Apache and SQL connections.
- Setting up LAN's, including physically crimping & running RJ45 cables through complex roofing systems.
- On occasion, when workload was heavy, helped out on the shop floor soldering, wire making, electronic testing, etc.

EDUCATION

LEVEL 3 ADVANCED DIPLOMA IN ICT SYSTEM & PRINCIPLES

Zenos Academy | 2011-2012

11 X GCSE, GRADES A-C

John Hampden Grammar School | 2006-2011

PRIMARY EDUCATION 11+ PASS

Crown House Private School | 1999-2006

ADDITIONAL SKILLS/ACHIEVEMENTS

- Attended 2 Adobe Experience Manager training courses for developing on AEM but have yet to implement the learning on an AEM instance.
- Volunteer helper at the Peel Ski Club which helps the disabled and physically challenged experience skiing using specially designed equipment. This includes regular visits to the Gloucester ski slope and I have also been lucky enough to help the charity for a week in Austria.
- Built a Charity website for an event supporting MS society.
- 2 years doing the Invesco Lakes + Snowdon challenge. Involves hiking, cycling and kayaking over the course of a weekend with a team, racing other teams. Through this I have learnt valuable team work skills.
- Achieved Community Team Leader Manager at John Hampden Grammar school and was fully committed to the role for several years, learning valuable managerial skills.
